

ABOUT ME

I build analytical systems that help businesses make data-driven decisions. I specialize in ETL, Data Modeling, and KPI visualization. My strengths include a systematic approach, data quality control, and a focus on economic impact.

WORK EXPERIENCE

SVOY DOM

Astana

Jun 2024 - Present
1 yr 9 mos

Data / Financial Analyst

- Integration of data from 1C, CRM, Excel into Power BI
- Development and support of ETL processes (Power Query)
- Data Modeling and building analytical data models
- Development of KPI dashboards and management reporting (Dashboarding)
- SQL analytics in PostgreSQL (JOIN, GROUP BY, window functions)
- Analysis of financial indicators: P&L, Cash Flow, unit economics
- Data Validation and data quality control
- Anomaly detection and cost optimization based on data analysis
- Using Python (pandas, numpy) for EDA and dataset preparation

GEOMETRY.KZ

Astana

Jan 2024 - Jul 2024
7 mos

BI Analyst

- Led full-cycle BI system implementation: requirements gathering, architecture design, development, and launch (5 projects in retail)
- Designed analytical models and data marts considering industry specifics
- Optimized report performance (DAX), reducing response time from 12 to 2 seconds and tripling KPI response speed
- Restructured ETL and eliminated data integration errors from 1C, ensuring correct and automatic report updates
- Implemented a Data Validation system with anomaly alerts and source integrity control
- Integrated external APIs and social media into Power BI, enabling end-to-end analytics and self-service dashboarding
